

Samples: Claims Units Selection

The option you select may affect your ability to register these claims in the event that multiple prospectors are registering the same area.

- **Register none if I cannot secure all the requested claim units (ALL OR NOTHING)** = You choose to accept the entire area if it is available, but accept none of the area if it is only partially available.

- **Register some if the remaining claim units are contiguous (SOME)** = In the event of overlap with another prospector's claims, you will accept only the areas that create a contiguous group.

- **Register any claims that are available (ANY)** = In the event of overlap with another prospector's claims, you will accept any part of the area if it is partially available. Note this may result in the generation of multiple groups if the claims are not contiguous.
