

To Who it May Concern,

In the last sixteen years I have been needing to get some important information for my son who has Downs' Syndrome, who now will be . This information would have been very important to his Family Court case because of 's special needs and he isn't not aloud to speak in court for himself. I need information form the School Board about and his sister. I was refused that information. I wanted some information about his sister, about when she was in elementary school and the teacher said she needed to see a psychologist but didn't say why. I want to know why and for Family Court to know why to help my hand -capped son , When our children spend half od their life in school their parents need to know this information to protect them . Any school records about my two children from my first married, if it's important to help my son .

I think if it important to my son and Family Court then we should have acess. Also, all Health and Community Services records should be brought forward for his case to protect my son or other children cases , and who are we protecting anyway ? Children should come first always the protection and care should come first! Also, If hospital corporations have any information important to my son's Family Court case, then it should be brought forward to his case and potection! Also, I want excess to my school files or records for my own history. Also, When I work for , and if they have any information important to me then I want excess to those file or records. Also, If the Department of Post -Secondary Education, Training and Labour had some important information that I needed to get help for training or education ,then I think I should have excess to that also. I also, think I should have excess to information about myself from the police. When I needed their protection and I went to ask help from them when I was 14 years old when I had a problem at home. I will study this report and think critically about it . We need to start thinking out side the box and look at the big picture and be more innovative .

If you have any questions I will like to answer them !
