

Independent Review Panel of the Work[place Health, Safety and Compensation System

I would like to lend the support of myself and my department members to the issues raised by Andrew E MacDonald Insurances Services. The fire service of New Brunswick is in a state of construction in moving to maintain services to all residents of the province. The voluntary fire service members are by far the majority of fire service providers. The change as suggested by Mr Andrew MacDonald to allow employers, [the Province of New Brunswick] to supply additional coverages to their employees without facing a conflict with and reduction of payments from the WHSCS would benefit the retention of current members and attraction of new members.

George MacLeod, Fire Chief, Oak Bay Fire Dept
