Yes my problem is the 5% set aside amount should be paid on the full amount EX. was receiving \$1852 a month and 5% set aside amount of \$92 was being put away each month .Then filed for cpp disability and cpp now pays \$804 a month the wcb take away the 804 from the 1852 which 1058 dollars and only put 52 dollars a month \THEY SHOULD PAY ON THE TOTAL AS THE CPP DISABILITY IS BECAUSE OF INJURIES THAT ARE ALL WCB CLAIMS AND BESIDES I PAY TAXES ON THE CPP
this SS.38.22(1) of the act should read The sub section states that 5% payment is made on the compensation paid and should also state if cpp received is compensation related the 5% also applies and this should be retroactive from 1998

Yes I contact the wcb about my glasses as its been 21/2 years and my eye has change in vision .
My concern is now the wcb only cover frames every five years when I lost my eye the my eye surgon said I required glasses on going then the board said new glasses every 2 years but change this in 2004 to five years its bad enough to have an artifical eye let alone outdated glasses
.I check with blue cross and manulife insurance they cover glasses every 2 years so the board should go back to the two year program. This is just another way to skin the Injured workers of New Brunswick
